

## Be a Good Sort

To make sure your recycling can be recycled, please put it in our bins **and sort it as follows:**

**Bin #1: Put all your Paper, Tin/Aluminum Cans, and recyclable Plastic Bottles in one bin.**

You can recycle newspapers, scrap paper, junk mail, cereal boxes, and flattened cardboard. Rinse out **Tin & Aluminum Cans**. You can recycle **Plastic Bottles & Milk Jugs** - rinse them out and remove the lid. (**Rule of Thumb: The neck must be smaller than the Base**). We can't recycle plastic tubs, foam, toys, bubble wrap, or molded plastic wrap (blister wrap). We can't take any pesticide or motor oil containers. We can take **Scrap Metal**, if it's less than 30" long, and free of plastic, rubber or other non-metal materials. Clean plastic tubs & lids: yogurt, cottage cheese, salsa, etc Buckets & large tubs (laundry detergent, kitty litter) Nursery pots (clean - no dirt)

**Bin #2: Put all your Glass Bottles & Jars in the second bin - glass must be kept separate.**

Rinse glass bottles & jars and take off lids. (Labels are okay.) **Please! Only Bottles & Jars!** No window panes, mirrors, drinking glasses, bakeware, crystal, etc. **Just Bottles & Jars.**

**Put your used Motor Oil in a plastic jug** that is unbreakable, leak-proof, has a screw-top lid, and isn't bigger than 2 gallons. Recycle motor oil only! No Anti Freeze or Transmission Fluid. Please don't set out more than 2 containers of motor oil per week.

*Please! Never use PLASTIC BAGS for recycling!*

**PLEASE RECYCLE WEEKLY -  
IT HELPS US BE MORE EFFICIENT!**

## Be a Good Sort

When we pick up your recycling, we take it to a recycling center for recovery and reuse, which means we have to deliver your recycling according to their rules. Here are some additional details to make sure your recycling is acceptable ... And please! Never use plastic bags for recycling!

**Put all your paper, tin & aluminum cans, scrap metal, and plastic bottles in Bin #1.**

Flatten all **Cardboard**. Put small boxes in the bin ... Put larger boxes under the bin, but no bigger than 3' x 3'. You can recycle **Scrap Paper, Newspaper, Magazines**, etc. but don't recycle **Paper** if it's contaminated with food, oil, etc. Don't recycle tissue paper, paper towels, napkins, foil, or paper coated with wax. Rinse & flatten **Milk/Juice Cartons & Drink Boxes** (no straws!). Remove the label (& put it with your scrap paper) & rinse **Tin & Aluminum Cans**. You don't have to remove the ends, or flatten them, but it helps us save space in our truck. **Aerosol Cans** can be recycled - but don't try to flatten or puncture them, or remove the nozzle. Just take off the lid & put them in the bin, as is. You can recycle **Scrap Metal** that's up to 30" long, less than 40 lbs, and is free of plastic, rubber or other contaminants.

You can recycle a **Plastic Bottle** if the neck is smaller than the base, or it has a screw top. Discard lids, caps, & pumps - rinse bottles out & put them in the bin. Don't try to recycle the containers from motor oil, pesticides, or any hazardous material. Don't recycle plastic bags, toys, tubs (like margarine tubs), foam, or bubble/blister wrap.

**Put all your Glass Bottles & Jars in Bin #2:** Rinse them out & take off the lid. Recycle **ONLY** bottles & jars - no windowpanes, mirrors, drinking glasses, bakeware, crystal, figurines, etc. **Glass must be kept separate from any other recyclable!**

**Put your used motor oil in a plastic jug** that is unbreakable, leak-proof, has a screw-top lid, and isn't bigger than 2 gallons. Recycle motor oil only! We cannot recycle antifreeze or transmission fluid. Please don't set out more than 2 containers at a time.

**Thank you for making  work for all of us!**
